

The Stockwell Way - Computing INTENT

**Stockwell
Academy**

Computing lessons at Stockwell should allow children to develop a wide range of transferable skills, with the knowledge and understanding to apply these in context to keep themselves safe in an online environment. By teaching these skills in engaging ways, the computing curriculum aims to support our Stockwell values - Imagine, Believe, and Achieve.

The subject pillars are:

To practise safe behaviour on the internet by
developing *digital literacy*.

To communicate and work collaboratively using
information technology.

To develop problem-solving skills through *computer
science-based challenges*.

To become independent, resilient users of computing
technologies.

To develop a robust skill-set that can be used to support
subjects across the curriculum.
